Inspired by the Maastricht declaration, which provided a framework for the development of many streams now constituting Global Education, while providing a vision, a reference point and clear goals, we have made progress over a decade in:

- Conception: with clarity and increased refinement of the concept;
- Awareness: that global education is an urgent necessity for democratic, sustainable societies.

- Funding: both government and civil society funding, including new funding lines;
- Structures: new agencies and the stronger involvement of civil society, local authorities and institutional support;
- Coordination of Ministries and Agencies; in the involvement of civil society, and in the sharing of international experience;
- Sectoral spread: in formal education, non-formal education and informal learning;
- Reach: in the number and type of schools and other learning settings, various curricula involved, more involvement of regional and local level (federal states, municipalities), included in teacher education and training;

- Quality: with enhanced support, evaluation, definition of quality criteria, and dissemination of learning;
- Research and academic practice, and the growth of academic centres and networks in the field;
- Paradigms: with shifts from target to partnership approaches, from top-down to more participatory and mixed strategies; and with the move from issue-knowledge to a focus on competencies.
